Zero initial

y/w

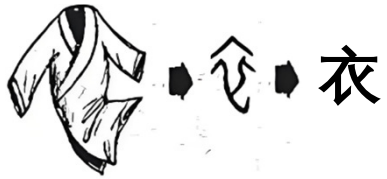

Initial y/w

- Does not produce any sound on its own
- Serves as a sound barrier in pinyin.

Sound barrier: some syllables start with vowels, such as “i, u, ü.” If these are written directly, they might appear incomplete. Therefore, we add “y” or “w” in front of these vowels, like a “little coat” for vowels.

Basic for Chinese writing

The formation of Chinese Characters

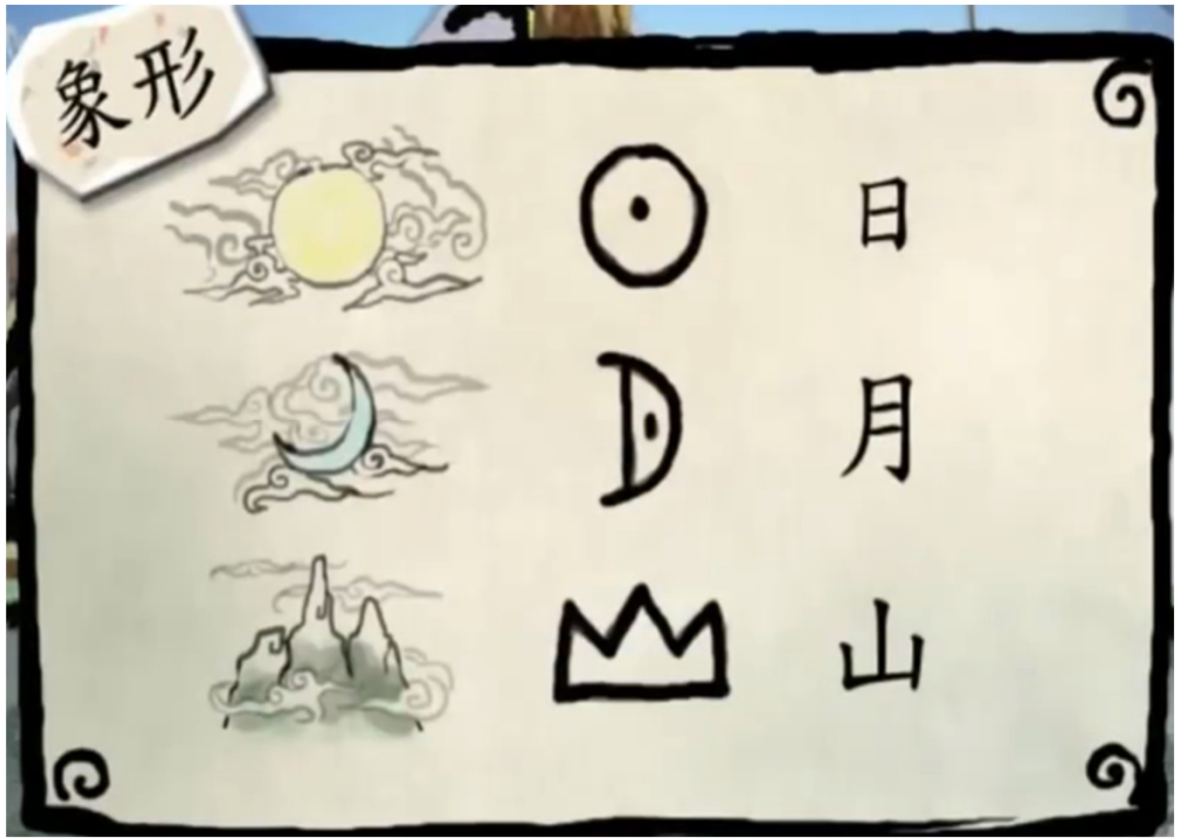

Unlike English, which is an alphabetic language, Chinese writing is represented by “characters,“ each of which represents a syllable.

Chinese characters are ideographic, and there are six ways for creating them.
