

1. Environment

- Operating System: Windows 10
- IDE: IntelliJ IDEA 2025.2
- JDK: OpenJDK 24 or higher
- Tools: PlantUML plugin for IntelliJ IDEA (for drawing UML diagrams)

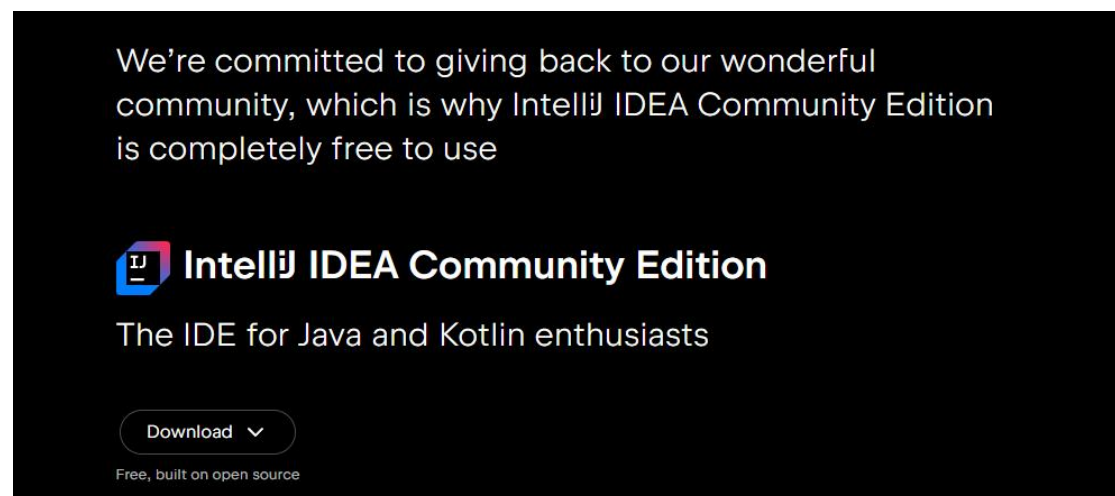

2. Download and install IntelliJ IDEA

If you have already installed an older version of IntelliJ IDEA Ultimate or IntelliJ IDEA Community, you can skip this step.

(1) Download and install IntelliJ IDEA Community

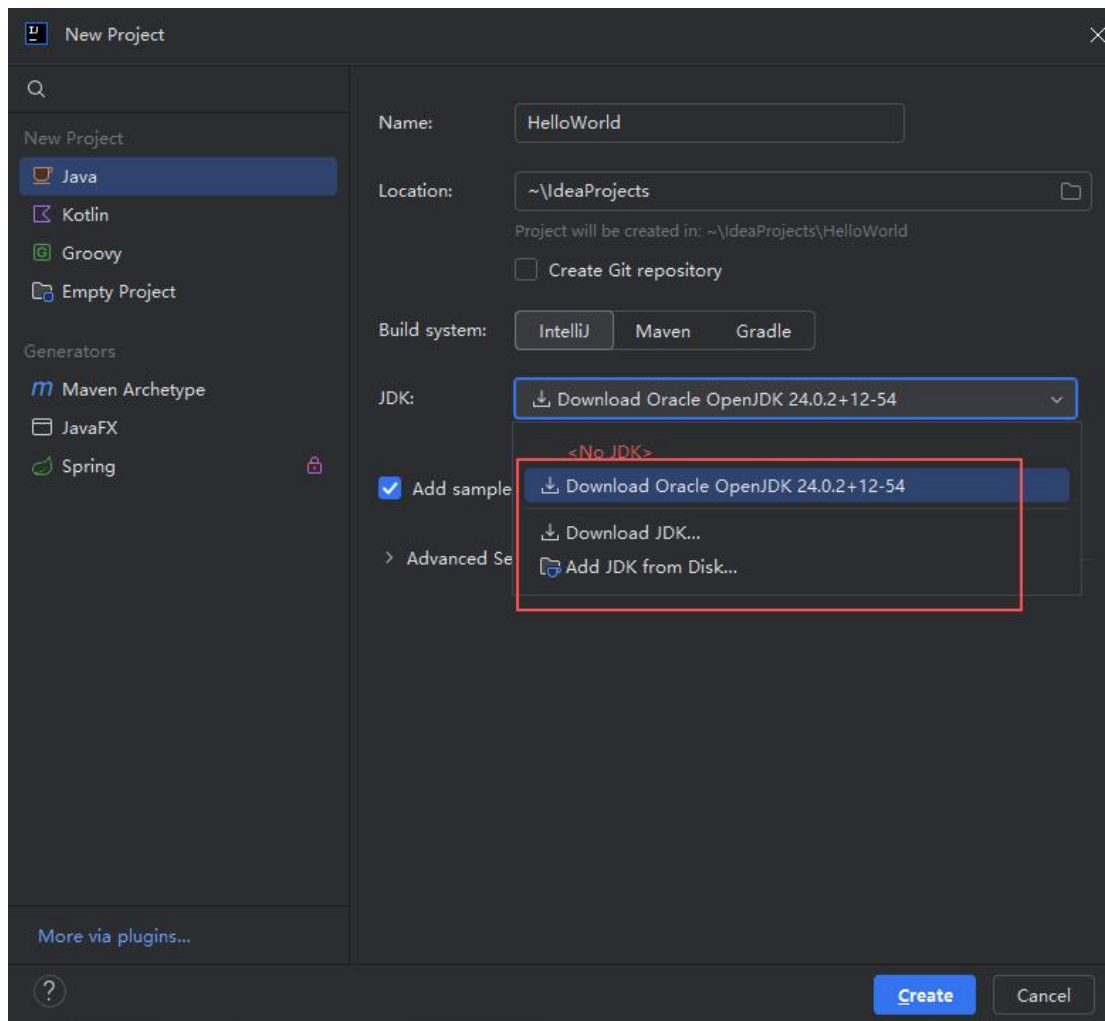

Download link: [Download IntelliJ IDEA](#)

Note: Scroll down the page to find the Community Edition

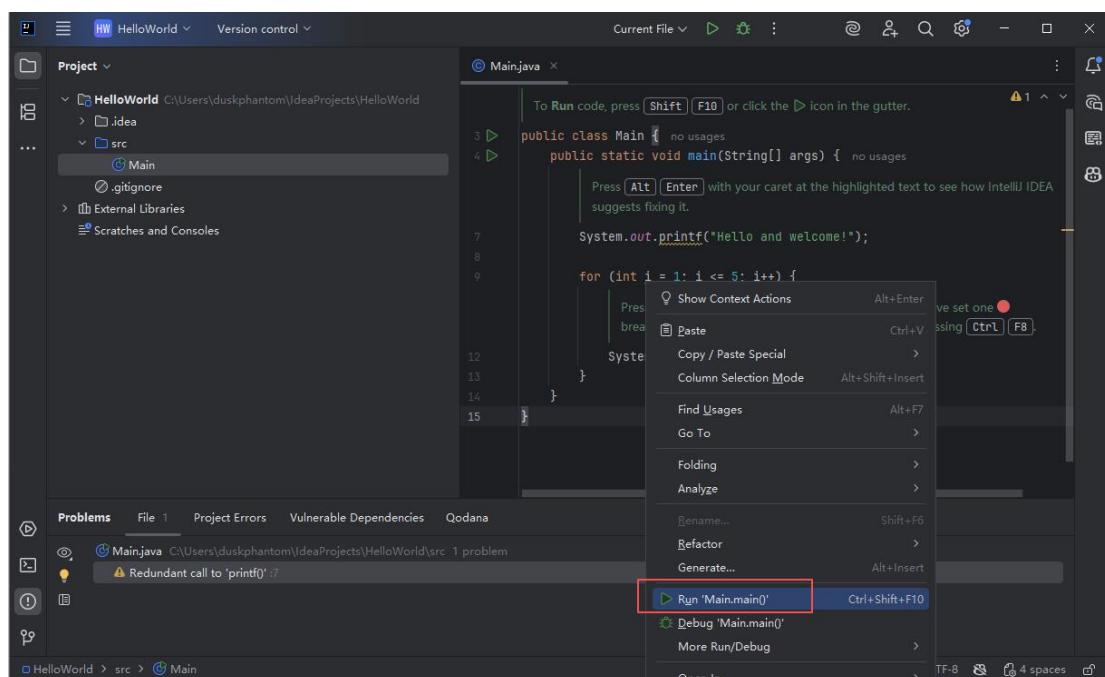

(2) Create a new Project, download or add the specified version of JDK.

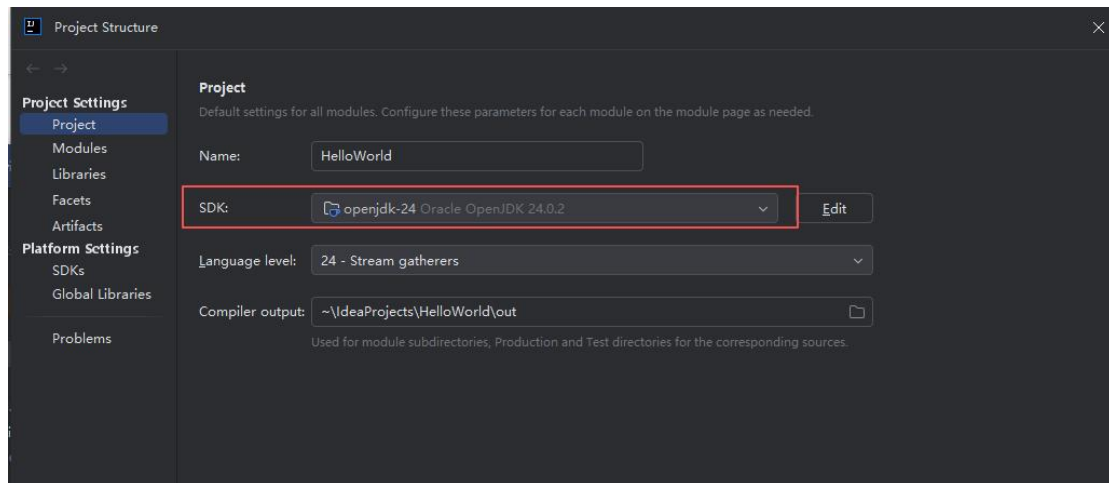

The default JDK version for the latest IntelliJ IDEA 2025.2 is OpenJDK 25 now.

After waiting for the JDK download to complete (there is a progress bar at the bottom of the page), right-click and select "Run Main.main()" to run the program.

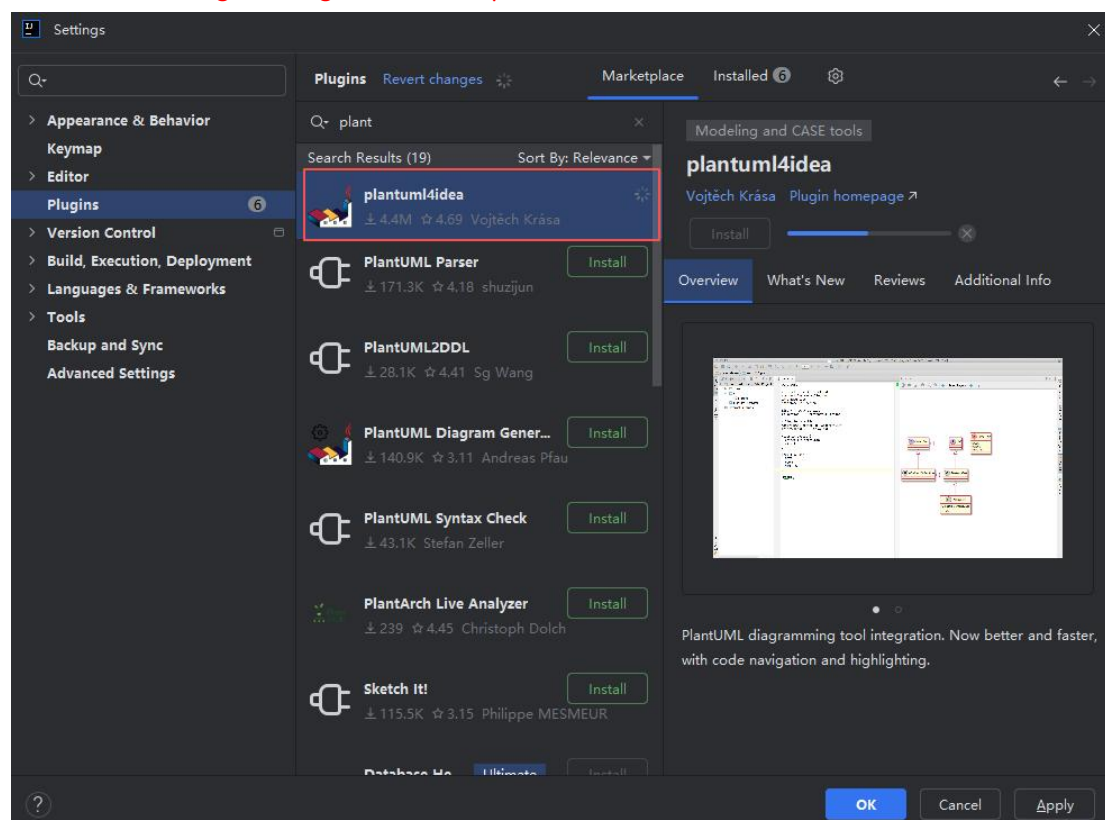

If you need to modify the JDK of the project, you can click "File" and select "Project Structure" to change it.

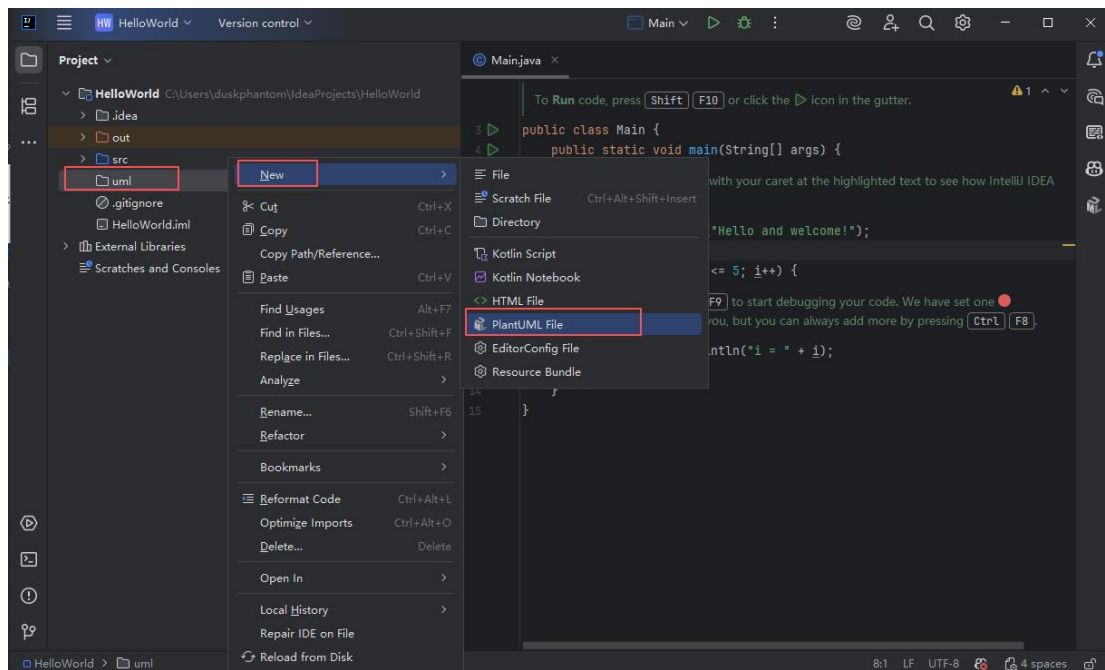

(3) Download and install the PlantUML plugin

PlantUML is an open-source project that supports quick and convenient drawing of UML class diagrams. It provides a plugin for IntelliJ IDEA. You can search for "PlantUML" in IDEA's plugin management, install it, and then restart IDEA to complete the integration.

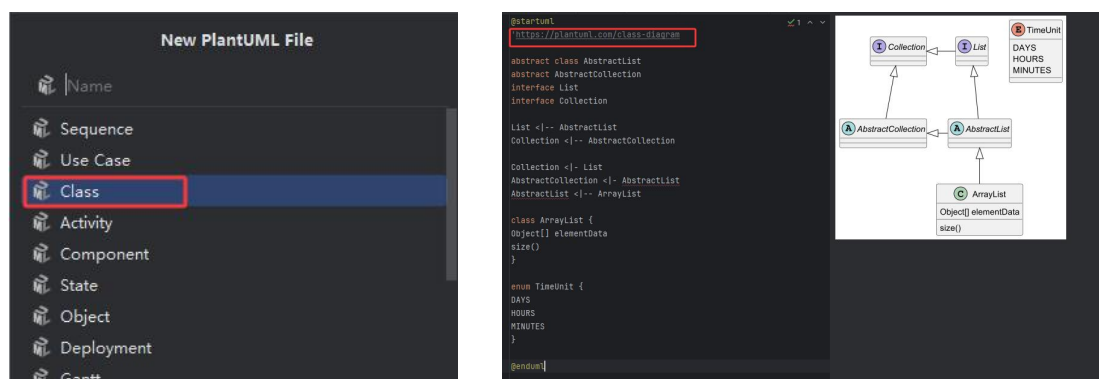

Click File --> Settings --> Plugins --> Marketplace, search for "PlantUML", and install it.

Create a new "uml" folder, select the folder, right-click and choose "New", then create a new PlantUML File.

Select the Class Diagram option:

You can learn how to use PlantUML through its official website.
